

## Composite Top Section

Fits all aluminum bases  
Weight: 2.8 Kgs

C-Spar for Laser top section is the same weight and stiffness as the laser branded aluminum section.

It is designed for use by the serious laser sailor who wants a composite equivalent of the competition spar that is more resilient and durable.

Ideal for training, the C-Spar for laser top section will allow hours of sailing in race mode without fatiguing the regatta spar.

Price excluding sales tax

NZ\$385.00
